Dear Assemblymember Levine,

This week you stood up for clean energy in California by signing on as a coauthor of SB-100: California Renewables Portfolio Standard Program: Emissions of Greenhouse Gases. Thank you for pushing California's government to continue to lead the way in reducing greenhouse gases and protecting the environment and the world's inhabitants.

California's leadership has demonstrated that renewable energy is a viable, successful, large-scale strategy for reducing greenhouse gas emissions, toxic pollution, and environmental degradation.

There is much work to be done to mitigate climate change but working together, with leadership such as yours, we can make it happen!

Sincerely,
