Protecting Marin Since 1934

Maggie McDonogh
Angel Island Ferry
21 Main St
Tiburon, CA 94920

Dear Ms. McDonogh:

The Marin Conservation League (MCL) strongly supports your plan to convert the Angel Island ferry from diesel to electric propulsion. As you know, MCL was instrumental in preserving Angel Island as a State Park. The organization has evolved over the years to recognize that being conservationists involves more than protecting habitats. We must conquer other impacts humans have on our world. Your plan to improve not just the operating air quality of the Angel Island ferry, but also one of the State Park boats is truly laudable.

MCL supports your plan and encourages funding agencies to help the transition by providing funding to support the effort.

Yours truly,
